

ASSOCIATION OF SOUTHEASTERN RESEARCH LIBRARIES

UPDATED: April 16, 2020

Service in a Time of Global Disruption

Many libraries are contending with significant operational disruptions due to the COVID-19 pandemic. ASERL is accelerating delivery of our acclaimed professional development webinars to serve our members and others who are displaced from their normal routines and responsibilities. These sessions have been selected to serve the needs of people working in many different roles in ASERL libraries.

These sessions are **available at no cost** and the recordings made available under a Creative Commons license at www.aserl.org/archive. Participants in the 'live' sessions will receive a certificate of attendance via follow-up email.

The updated offerings in this series are listed below; **please check** www.aserl.org as the schedule will be continually updated.

Upcoming ASERL-hosted Webinars

Are Leaders/Managers Born, or Made?

April 28, 2020 at 2pm ET / 1pm Central Time Strong leadership is the most significant driver of high morale and productivity. In fact, poorly trained, inadequate leaders cost large organizations billions of dollars lost in productivity, low morale, and turnover. On the other hand, successful organizations are full of strong, passionate leaders who make a real difference. The question is: Are these leaders born or made?

Recorded webinars from WRLC's 2020 Virtual Membership Meeting

Cultivating Leadership in the Next Generation of Librarians

RECORDING: <https://youtu.be/MeubXNPWEE>

What does leadership or management mean to you? Is it limited to a title in your organization's hierarchy? Cultivating value in your organization can be challenging no matter the position you hold. If leadership is about influence and vision, it shouldn't be limited by position. Our speakers discuss what being a leader means to them within the context of both formal and informal opportunities to influence individuals and outcomes.

Personal librarianship: Impact on Information Literacy Confidence and Academic Outcomes

Service in a Time of Global Disruption:
Upcoming ASERL Professional Development webinars
and Recordings from WRLC's 2020 Virtual Membership Meeting
page 3

March 31, 2020

RECORDING: <https://youtu.be/FAe3rFixH6c>

Many academic libraries have implemented personal librarian programs, seeking to improve relationships with students and reduce library anxiety. This session shares early findings and lessons from a personal librarian research study at the University of District of Columbia that occurred in a general education class during the fall 2019 semester. Speakers discuss the pros/cons of our approach and how, if at all, personal librarians supported student success.

Saving Their Memories: Oral History Capture and Curation

RECORDING: <https://youtu.be/mRt1LV5Rcmo>

Interested in setting up an oral history program for your institution, and not sure what is involved? Speakers discuss George Mason's experience in putting one together, maintaining, and growing it, with respect to personnel, equipment, workflows, and best practices.

Using APIs to Increase Alma Workflow Efficiency

RECORDING: https://youtu.be/QGpN6_4aJXA

Staff at the Washington Research Library Consortium have developed applications to facilitate working with the records for materials in each member library's Alma Institution Zone. These applications can create or edit fields in the bibliographic, holding and item records without using the Alma interface or user roles. The applications can be especially beneficial for library staff and student assistants who do not need full resource management privileges to perform a discrete task. Recently completed apps have improved Alma workflows for the Shared Collections Facility, leading to significant improvement in efficiency and cost control.

Using Alma Analytics In Our Day-To-Day Work

RECORDING: https://youtu.be/WcODy53_HLs

The Alma Analytics Training Team has been helping individuals build their capacity to use the Alma Analytics tool since July 2018. Twenty months later, WRLC libraries are able to see the impact of the tool on their day-to-day work. A panel of Analytics users will share specific examples of reports, how they are used, and how their workflows have changed since the migration.

The Living Alma Community Zone Community: Working with Community Contributed Records and Collections

RECORDING: https://youtu.be/GPqiWNY_YJs

The Alma Community Zone (CZ) is a centralized, comprehensive platform focused on electronic resource offerings, leveraging community cataloging and knowledge. The CZ is an ever-evolving and increasingly complex resource that librarians and paraprofessional staff must learn to navigate effectively. Ex Libris User communities have often voiced dissatisfaction with the overall quality of the

metadata within the CZ, particularly for ebooks. Through Community Contributed Records and Collections, Ex Libris users have the opportunity to contribute robust metadata directly to the CZ—empowering users with useful tools that can help shape and raise the overall bibliographic standard of CZ metadata.

A New Approach to Finding Aid Displays with Web CMS

RECORDING: <https://youtu.be/SERaEEb5PM8>

Catholic University Libraries' website transitioned to a new University enterprise Content Management System (CMS) in 2019. The libraries' Web Team used this opportunity to implement substantive enhancements to the appearance of its finding aids to archival collections. This presentation discusses this process and the improvements, setbacks, and lessons learned.

Supporting Faculty Research with Online Exhibition Software Platforms: Tropy, WordPress, ESRI StoryMaps, and Omeka-S

RECORDING: <https://youtu.be/TlflhclMjtE>

Learn about a collaboration between American University Library and AU's Center for Teaching, Research, and Learning to promote online exhibition platforms as a way of showcasing faculty research. Speakers provide use cases and examples for each platform (i.e., Tropy, WordPress, ESRI StoryMaps and Omeka-S).

Web Accessibility Strategies for the New Decade

RECORDING: <https://youtu.be/AZP49ivSyQo>

Section 508 was added to the Rehabilitation Act in 1998 and the Web Content Accessibility Guidelines 1.0 became a W3C recommendation in 1999. Despite these laws and guidelines having now been in place for over twenty years, the progression of Web technology and the corresponding evolution of accessibility recommendations has made compliance, if anything, even more difficult. The presenter gives a brief overview of recent accessibility-related developments followed by a demonstration of accessibility evaluation and remediation techniques of varying technological complexity.

Absentee Ballot Day in the Library

RECORDING: https://youtu.be/eVUCT_Kp5cY

In 2018, the American University Library held its first Absentee Ballot Day and helped over 1,000 students request absentee ballots. Gwendolyn Reece has created an Absentee Ballot Day toolkit, started a listserv for collaboration and will share all you need to host an Absentee Ballot Day at your library. The WRLC Library Directors Council has endorsed the idea.

DIY VHS Preservation for Libraries

RECORDING: https://youtu.be/E0Z7FTJx_4w

By the end of the decade, library VHS collections will be unusable due to degradation and obsolescence. Faced with losing access to their collection of 4000+ out-of-distribution VHS titles, the American University Library developed a comprehensive do-it-yourself plan to preserve their collection. Chris Lewis and Phil Salvador from American University explain their VHS preservation project and how it fits within their collection management responsibilities. Their project offers a potential blueprint for others to develop a practical, cost-effective process to preserve their collections.

Getting Started with Library Privacy: Privacy Practices for Library Personnel

RECORDING: <https://youtu.be/FrXWSLZcT44>

Listen to this session to learn some concrete skills and attitudes that can help protect the privacy of our communities. The speakers start with the concept of “threat modeling” to help viewers understand the risks to their data from a more theoretical perspective, and then move to concrete best practices to protect our data at both organizational and individual levels. They look at toolkits such as the ALA Library Privacy Checklists, EFF’s Surveillance Self-Defense training and the Library Bill of Rights. You’ll leave with a list of actions you could take to improve web privacy for yourself and your organization.

Teaching Computational Skills with the Carpentries

RECORDING: <https://youtu.be/jHoAHUb9ekQ>

As a means to address the ever increasing need for computational skills across disciplines and departments, many libraries and other research services providers on campuses around the globe have been participating in the Carpentries, a community-driven, global organization focused on teaching data and coding skills with evidence-based instruction practices. In this presentation, librarians from George Washington and George Mason Universities introduce the Carpentries, describe their participation in this effort at each school, and outline future plans for instruction and other services around computational literacy.
